

# Clear up your ponds with synbiotic water treatment

HEIQ  
SYNBIO  
AQUASAN

**Balance your pond's microbiome with probiotics, for clear water and happy fish! HeiQ Synbio Aquasan is a natural, sustainable solution to muddy pond water and threats to the well-being of your fish.**

- ✓ **Synbiotics** are a combination of **probiotics**, (good bacteria), supplemented with **prebiotics** (good sugars)
- ✓ **Biodegradable**, ph neutral
- ✓ **No biocides** used, no hazardous substances
- ✓ **Stimulates nitrogen bacteria**
- ✓ **Purifies pumps and filters**
- ✓ **Reduces organic dirt** (biofilm)
- ✓ **Improves water clarity**

## WHAT IS THE CHALLENGE?

Ponds tend to suffer from excessive dirt and bio-film that cause murky water, clogged filters, and odor problems. :

- **Odor formation**
- **Sludge formation**
- **Clogged filters**
- **Murky water**
- **Sterilizing water treatment disturbs the natural microflora**

## WHAT IS THE SOLUTION?

HeiQ Synbio Aquasan for pond water! Our **100% natural synbiotic product** increases the sustainability of water systems:

- **Acts as high-performance bio-dispersant**
- **Clears up pond water**
- **Removes and prevents the formation of organic pollution**
- **Clears up pumps and filters**
- **Lowers the need and cost for biocides**
